

Empire Life Emblem Moderate Growth Portfolio

Annual Management Report of Fund Performance

Management Discussion of Fund Performance

Investment objectives and strategies

Empire Life Emblem Moderate Growth Portfolio (the "Fund") seeks to provide long-term capital growth with moderate income. The Fund invests in a broadly diversified mix of primarily Canadian equities and fixed income securities through a combination of strategic and tactical asset allocation and a value-oriented approach to security selection. The Fund's target asset mix is 35% fixed income securities and 65% equity investments. Tactical shifts in asset allocation may be made by the portfolio manager with the objective of adding incremental value and optimizing this Fund's risk-return profile.

Risk

For the twelve-month period ending December 31, 2021 (the "Period"), the overall level of risk of investing in the Fund remained the same. The Fund is suitable for the investor who seeks long-term capital growth, has a low to medium tolerance for risk and wishes to diversify their portfolio through fixed income and equity securities to potentially reduce volatility.

Results of operations

For the Period, Series A of the Fund returned 10.2%, net of fees. The net returns of other series of this Fund are provided under the section titled "Past Performance." The series have different returns due to the expenses charged to each series. The S&P/TSX Composite Total Return Index, broadly representative of the Canadian equity market, returned 25.1% for the same Period. Fund returns are reported net of all management fees and expenses unlike the performance of an index that does not pay fees or incur expenses.

The Fund's blended benchmark returned 13.5% for the Period. The blended benchmark is composed of 35% FTSE Canada Universe Bond Index, 40% S&P/TSX Composite Total Return Index, 10% S&P 500 Index (CAD), 10% MSCI EAFE Index (CAD) and 5% S&P/TSX Small Cap Index. In the portfolio manager's view, the blended benchmark more closely reflects the market sectors in which the Fund invests, to provide a more useful comparison to the performance of the Fund.

The Fund underperformed its benchmark over the Period. The Fund's cash and bond positions detracted from performance in an environment of rising equity markets. The Fund's exposures to international equities detracted from performance, as these equity markets were relatively weak performers, particularly when factoring in the strong Canadian dollar. An overweight position in the Health Care sector was another notable detractor from the Fund's performance, as was stock selection in the Energy and Financials sectors.

The largest individual detractors from the Fund's performance included overweight positions in Fidelity National Information Services Inc., Parkland Corp., and Saputo Inc. In the portfolio manager's view, Fidelity Information Services Inc. underperformed due to investor concerns over increased competition from emerging competitors, which may impact the company's competitive advantages. In the portfolio manager's view, Parkland Corp. underperformed due to investor rotation towards other energy stocks that are more likely to benefit from higher oil prices. Saputo Inc. faced a challenging operating environment over the Period due to volatile global milk prices and decreased demand for their products due to pandemic related shutdowns.

An overweight allocation to U.S. stocks contributed positively to performance as U.S. stocks generally outperformed Canadian stocks. From a sector perspective, an underweight allocation to Materials contributed positively to the Fund's performance. Individual contributors to the Fund's performance include overweight positions in Alphabet Inc., Shaw Communications Inc., and Microsoft Corp. In the portfolio manager's view, Alphabet Inc. and Microsoft Corp. outperformed due to general investor demand for large cap technology related investments, particularly those with perceived insulation against pandemic related shutdowns. Shaw Communications Inc. performed well following a bid from Rogers Communications Inc.

During the Period, global equity markets posted gains in response to an economic recovery that picked up speed as the rollout of COVID-19 vaccines continued. Canadian cyclical and value-oriented stocks rebounded, and outperformed Canadian growth stocks. This benefitted the portfolio manager's orientation towards value stocks.

In the portfolio manager's view, inflation rose in response to large fiscal stimulus packages by governments and central banks, as well as a recovery in demand. This, in turn, resulted in tighter credit spreads and rising interest rates. A rise in bond yields bolstered the performances of banks and life insurance companies. The Fund benefitted from exposure to these companies.

Early in the Period, the portfolio manager allocated a small portion of assets from U.S. equities to international equities in search of what the portfolio manager believed were better value opportunities, as well as to better diversify the Fund geographically. The rebalance detracted from the Fund's performance as U.S. equities outperformed during the Period. Later in the Period, the portfolio manager allocated a portion of cash assets to bonds, which detracted from the Fund's performance as bonds slightly underperformed over the remainder of the Period.

Empire Life Emblem Moderate Growth Portfolio

Annual Management Report of Fund Performance

At the end of the Period, the Fund's asset mix consisted of 38.0% Canadian equities, 26.9% bonds, 16.8% U.S. equities, 12.9% international equities, and 5.4% cash and equivalents and short-term investments.

Recent developments

Looking ahead, the portfolio manager has a positive outlook for the Fund, particularly as economies in developed markets open up following their pandemic lockdowns, global vaccinations increase, and as new treatments come to market to fight COVID-19.

The Fund continues to have a significant weighting in the Canadian equity market, which is oriented towards cyclically sensitive sectors (such as Energy and Financials). The portfolio manager believes oil prices at their levels near the end of the Period should be supportive of the Fund's Energy sector investments. The portfolio manager also believes potentially higher interest rates should contribute to the performance of the Fund's Canadian bank and life insurance company positions. In the portfolio manager's view, valuations in Financials stocks, however, are somewhat less attractive given their strong performance over the Period. When opportunities arise, the portfolio manager also plans to take advantage of the Fund's ability to invest outside of Canada, allowing for a larger opportunity set of investments that meet the portfolio manager's value and quality criteria.

The portfolio manager aims to stay ahead of developing challenges and remains keenly focused on various themes in 2022; namely, positioning and policy decisions by central banks; the growing severity and root causes of inflation; geopolitical risks and their effects on market stability; and developments surrounding COVID-19, such as the Omicron variant. These developments may stall the recovery momentum and the Fund's performance.

At the time of writing, events regarding the Russia / Ukraine conflict and ensuing sanctions continue to rapidly evolve. Real-time news updates may cause markets to vacillate between fear and relief and will likely result in continued volatility in equity and credit markets, and potentially Fund performance.

Effective February 1, 2022, the deferred sales charge option and low load options are no longer available for new purchases. Effective on or about May 1, 2022, investors who hold Series A, T6 or T8 units through a discount broker will have their series redesignated as Series F units because trailing commissions are not paid in respect of Series F units, and, in accordance with upcoming regulatory changes, trailing commissions to discount brokers will no longer be paid.

Related party transactions

Empire Life Investments Inc. (the "Manager") is the manager, trustee and portfolio manager of the Fund. The Manager is a wholly-owned subsidiary of The Empire Life Insurance Company.

The Manager provides or arranges for the provision of all the management and administrative services for the day-to-day operations of the Fund, including providing or arranging the provision of investment advice, record keeping and other administrative services, some of which are provided by an affiliate of the Manager. In consideration of the management and administrative services, the Fund pays the Manager a monthly management fee calculated as a percentage of daily net asset value of each series of the Fund, other than in the case of Series I, where fees are paid directly by the investor to the Manager. The rates for each series are disclosed under "Management fees".

During the Period, the Manager absorbed \$205,935 of total expenses otherwise payable by the Fund, as compared to \$199,740 for the year ended December 31, 2020. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of the Manager and the Manager can terminate the waiver or absorption at any time.

Series description

The Fund offers the following series: A, T6, T8, F and I. Series A, T6 and T8 units are available to all investors other than, effective May 1, 2022, investors who invest through discount brokers. Series T6 and T8 are designed for investors seeking regular monthly cash flows from the Fund. Series F units are available to investors who have a fee-based account with their dealer and whose dealer has signed an agreement with the Manager. In addition, Series F units may be available to other groups where the Manager does not pay commissions to the dealers, including discount brokers. Management fees are payable by the Funds on all series except for Series I. Series I units are available to institutional and high-net-worth investors who meet a minimum investment threshold and who have entered into a Series I Agreement with the Manager. The management fee for Series I units is negotiated between the Manager and the investor and is payable directly to the Manager by the investor. Effective on or about May 1, 2022, investors who hold Series A, T6 or T8 units through a discount broker will have their series redesignated as Series F units. The redesignation of series may begin as early as March 2022.

(1) This information is derived from the Fund's audited annual financial statements.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund, or both.

(4) This is not a reconciliation of the beginning and ending net assets per unit.

(5) This information is provided as of December 31 of the year shown.

(6) Management expense ratio (MER) is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset value during the period.

(7) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(8) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

Management fees

The management fee for Series A, T6, T8 and F units is an annualized rate calculated as a percentage of net assets of the applicable series of the Fund and accrued daily and paid monthly to the Manager. The management fee for Series I units is negotiated between the Manager and the investor and paid directly by the investor, not by the Fund.

The Fund's management fees are used by the Manager to pay for the costs of the overall business and affairs of the Fund including activities related to making units of the Fund available to investors, providing or arranging for the provision of investment advisory services and/or marketing services to the Fund. Management fees are also used to pay trailing commissions in connection with Series A, Series T6 and Series T8 to registered dealers.

	As a percentage of management fees		
	Management fee rates	Dealer compensation	General administration, investment advice and profit
Series A	2.05%	54.58%	45.42%
Series T6	2.05%	52.54%	47.46%
Series T8	2.05%	60.18%	39.82%
Series F	0.85%	0.00%	100.00%

Annual Management Report of Fund Performance

Past performance

The indicated rates of return assume reinvestment of all distributions in units of the Fund. They do not take into account sales, redemption, distribution or optional sales charges that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

Year-by-year returns

The following bar charts show the annual performance for each series of the Fund and illustrate how each series' performance has varied from year to year. The charts show, in percentage terms, how much an investment made on the first day of each financial year would have increased or decreased by the end of the period. For the first year of a series, the percentage shown is the actual return of the series from its commencement of operations.

Series A

*From January 9, 2012 to December 31, 2012 (not annualized)

Series T6

*From January 9, 2012 to December 31, 2012 (not annualized)

Series T8

*From January 9, 2012 to December 31, 2012 (not annualized)

Series F

*From January 15, 2013 to December 31, 2013 (not annualized)

Series I

*From January 9, 2012 to December 31, 2012 (not annualized)

Annual Management Report of Fund Performance

Annual compound returns

This table shows the Fund's historical annual compound returns for each series of the Fund for the periods indicated compared to a broad based index and a blended index, as described below.

	1 Year	3 Years	5 Years	Since Inception*	Inception Date
Series A units ¹	10.2%	8.2%	3.8%	5.6%	January 9, 2012
Series I units ¹	12.8%	10.8%	6.3%	8.1%	January 9, 2012
Series T8 units ¹	10.2%	8.2%	3.8%	5.6%	January 9, 2012
Series T6 units ¹	10.2%	8.2%	3.8%	5.6%	January 9, 2012
Series F units ¹	11.5%	9.5%	5.1%	6.9%	January 15, 2013
S&P/TSX Composite TR Index ²	25.1%	17.5%	10.0%	9.1%	(10 year return)
Blended Benchmark ³	13.5%	12.9%	8.2%	8.2%	(10 year return)

(1) Net of all fees and expenses paid by the Fund.

(2) The S&P/TSX Composite TR Index is broadly representative of the Canadian equity market. The S&P/TSX Composite TR Index tracks the performance of some of the largest and most widely held stocks listed on the Toronto Stock Exchange.

(3) The blended benchmark is composed of 35% FTSE Canada Universe Bond Index, 40% S&P/TSX Composite TR Index, 10% S&P 500 Index (CAD), 10% MSCI EAFE Index (CAD) and 5% S&P/TSX Small Cap Index.

Summary of investment portfolio

The summary of investment portfolio may have changed since December 31, 2021, due to ongoing portfolio transactions of the Fund. Quarterly updates are available within 60 days after quarter-end, except for December 31st, the Fund's fiscal year-end, when they are available within 90 days.
