Interim Management Report of Fund Performance

---

## Management Discussion of Fund Performance

### Results of operations

For the six-month period ending June 30, 2019 (the "Period"), Empire Life Emblem Conservative Portfolio (the "Fund"), Series A, returned 7.4% net of fees. The net returns of other series of this Fund are provided under the section titled "Past performance." The series have different returns due to the expenses charged to each series. The Fund's benchmark, the FTSE Canada Universe Bond Index, broadly representative of the Canadian bond market, returned 6.5% for the same Period. The Fund's mandate is to invest in a diversified target asset mix of equity securities (35%) and fixed-income securities and cash (65%). Fund returns are reported net of all management fees and expenses for all series, unlike the returns of the Fund's benchmark, which are based on the performance of an index that does not pay fees or incur expenses.

The Fund's blended benchmark returned 9.5% for the Period. The blended benchmark is composed of 65% FTSE Canada Universe Bond Index, 25% S&P/TSX Composite TR Index, 5% S&P 500 Index (CAD) and 5% MSCI EAFE Index (CAD). In the portfolio manager's view, this comparison more closely reflects the market sectors in which the Fund invests, to provide a more useful comparison to the performance of the Fund.

The Fund outperformed its benchmark over the Period. Global equity markets enjoyed a better return than Canadian fixed-income securities. As a result, the Fund's diversified equity exposure in Canada, the U.S., and international markets contributed to its performance.

The Fund's allocation to high-yield bonds detracted from the Fund's relative performance compared to its benchmark as a result of the lower sensitivity of high-yield bonds to the decline in interest rates. High-yield bonds underperformed government bonds. The Fund's cash allocation, averaging almost 9% during the Period, was the largest detractor from performance. The asset class provided the lowest returns given the low interest rate environment. The Fund's foreign equity exposure was negatively impacted as the Canadian dollar appreciated against most major currencies.

During the Period, global bond yields declined swiftly. The U.S. Federal Reserve Board (the "Fed") shifted its policy stance, pausing plans for more interest rate increases after December's market volatility. Bond yields declined as a result of falling inflation expectations, the U.S.-China trade dispute and a deteriorating growth outlook, particularly in Europe and China.

Both the Fed and European Central Bank indicated their readiness to cut interest rates, resulting in a rebound in government bonds. The U.S. 10-year Treasury yield fell below 2% for the first time since 2016. In Germany and France, 10-year bond yields fell into negative territory at record lows. While other major central banks signaled potentially lower interest rates, the Bank of Canada was expected to hold Canadian interest rates steady. This contributed to a rise in the Canadian dollar versus the U.S. dollar and other international currencies. Canadian 10-year government bond yields declined from 1.96% to 1.46% over the Period.

Canadian equities outperformed U.S. and international equities. Much of the Canadian equity performance came in January, backed by strength in the Energy sector. A recovery in Canadian crude oil prices stemmed from oil production curtailments mandated by the Alberta provincial government. Canadian value-style stocks (those with lower price-to-book ratios, lower price-to-earnings ratios and higher dividend yields) generally underperformed the overall Canadian equity market.

The Fund's fixed-income securities maintained a neutral duration (sensitivity to interest rates), which was slightly shorter than the benchmark. The Fund is positioned with an overweight allocation to corporate bonds, much of which is in high-quality investment grade issuers. As credit spreads declined below historical averages during the Period, the portfolio manager became progressively defensive in the Fund's corporate bond holdings.

Late in April, the portfolio manager sold a modest portion of the Fund's international equities, and primarily allocated the proceeds to U.S. equities. The rationale was to increase the Fund's exposure to the U.S. dollar and to stocks whose underlying businesses the portfolio manager believes to be more stable. Since that portfolio shift, U.S. equities generally outperformed international equities. However, weakness in the U.S. dollar (as a result of market expectations of falling interest rates in the U.S.) more than offset that performance advantage. At the end of the Period, the Fund was composed of 53% in bonds, 21% in Canadian equities, 9% in U.S. equities, 6% in international equities and 11% in cash and short-term investments.

### Recent developments

As higher tariffs and increased trade tensions have increased the cost of doing business, the risk of a softening global economy has increased, and driven interest rates lower. The portfolio manager expects moderate growth and more cautious central banks, which should support fixed-income holdings. The portfolio manager expects interest rates to remain low over the longer term. The greatest long-term risks to bond prices are the risks of inflation and higher interest rates. Inflation expectations are low, and there may be a repricing in inflation expectations, which could cause a return of volatility to fixed-income assets.

The portfolio manager maintains a positive outlook for Canadian equities over the medium-to-long term. Over the shorter term, however, the portfolio manager is more cautious. Accordingly, the portfolio manager expects to position the Fund with an elevated cash level and an increased exposure to stocks whose businesses are believed to be more stable. Global economic growth is believed to be challenged by the continuing trade

# Empire Life Emblem Conservative Portfolio

## Interim Management Report of Fund Performance

dispute between the U.S. and China. Additionally, the length of the current general rise in stock markets (since 2009) has been among the longest on record, which correlates to overall stock valuations that are believed to be somewhat expensive. This, in the portfolio manager's view, incrementally increases the risk of a near-term general correction in stock markets.

### Independent Review Committee ("IRC")

One of the IRC members is retiring effective December 31, 2019. Recruitment for a replacement is underway.

### Related party transactions

Empire Life Investments Inc. (the "Manager") is the manager, trustee and portfolio manager of the Fund. The Manager is a wholly-owned subsidiary of The Empire Life Insurance Company.

The Manager provides or arranges for the provision of all the management and administrative services for the day-to-day operations of the Fund, including providing or arranging the provision of investment advice, record keeping and other administrative services, some of which are provided by an affiliate of the Manager. In consideration of the management and administrative services, the Fund pays the Manager a monthly management fee calculated as a percentage of daily net asset value of each series of the Fund, other than in the case of Series I, where fees are paid directly by the investor to the Manager. The rates for each series are disclosed under "Management fees".

During the Period, the Manager absorbed \$86,489 of total expenses otherwise payable by the Fund, as compared to \$87,322 for the six month period ended June 30, 2018. The amount of expenses waived or absorbed is determined annually on a series by series basis at the discretion of the Manager and the Manager can terminate the waiver or absorption at any time.

### Series description

The Fund offers the following series: A, T6, F and I. Series A and T6 units are available to all investors. Series T6 is designed for investors seeking regular monthly cash flows from the Fund. Series F units are only available to investors who have a fee-based account with their dealer and whose dealer has signed an agreement with the Manager. Management fees are payable by the Fund on all series except Series I. Series I units are available to institutional investors who meet a minimum investment threshold and who have entered into a Series I Agreement. The management fee for Series I units is negotiated between the Manager and the investor and is payable directly to the Manager by the investor.

### Financial highlights

The following tables show selected key financial information about the Fund and are intended to help you understand the Fund's financial performance for the Period and each of the other periods as shown below. This information is derived from the Fund's unaudited interim and audited annual financial statements for the period.

#### The Fund's net assets per unit<sup>(1)</sup>

(1) This information is derived from the Fund's unaudited interim and audited annual financial statements.

(2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.

(3) Distributions were paid in cash or reinvested in additional units of the Fund, or both.

(4) This is not a reconciliation of the beginning and ending net assets per unit.

(5) Management expense ratio (MER) is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the period and is expensed as an annualized percentage of daily average net asset value during the period.

(6) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net asset value during the period.

(7) The Fund's portfolio turnover rate indicates how actively the Fund's portfolio advisor manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the period. The higher a fund's portfolio turnover rate in a period, the greater the trading costs payable

# Empire Life Emblem Conservative Portfolio

## Interim Management Report of Fund Performance

by the fund in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of a fund.

### Management fees

The management fee for Series A, T6 and F units is an annualized rate calculated as a percentage of net assets of the applicable series of the Fund and accrued daily and paid monthly to the Manager. The management fee for Series I units is negotiated between the Manager and the investor and paid directly by the investor, not by the Fund.

The Fund's management fees are used by the Manager to pay for the costs of the overall business and affairs of the Fund including activities related to making units of the Fund available to investors, providing or arranging for the provision of investment advisory services and/or marketing services to the Fund. Management fees are also used to pay trailing commissions in connection with Series A and Series T6 to registered dealers .

	As a percentage of management fees		
	Management fee rates	Dealer compensation	General administration, investment advice and profit
Series A	1.75%	45.94%	54.06%
Series T6	1.75%	39.66%	60.34%
Series F	0.75%	0.00%	100.00%

## Interim Management Report of Fund Performance

### Past performance

The indicated rates of return assume reinvestment of all distributions in units of the Fund. They do not take into account sales, redemption, distribution or optional sales charges that would have reduced returns or performance. The past performance of the Fund is not necessarily an indication of how it will perform in the future.

### Year-by-year returns

The following bar charts show the annual performance for each series of the Fund for each of the years ended December 31, and includes the performance for last the six months ended June 30, 2019. The charts illustrate how each series' performance has varied from year to year and show, in percentage terms, how much an investment made on the first day of each financial year would have increased or decreased by the end of the period. For the first year of a series, the percentage shown is the actual return of the series from its commencement of operations.

**Series A**

\*From January 9, 2012 to December 31, 2012 (not annualized)

**Series T6**

\*From January 9, 2012 to December 31, 2012 (not annualized)

**Series F**

\*From January 15, 2013 to December 31, 2013 (not annualized)

**Series I**

\*From January 9, 2012 to December 31, 2012 (not annualized)

#### A NOTE ON FORWARD-LOOKING STATEMENTS

This report may contain forward-looking statements about the Fund, including its strategy, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects," "anticipates," "intends," "plans," "believes," "estimates" or negative versions thereof and similar expressions. In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement.

Forward-looking statements are the opinions and views of Empire Life Investments Inc. based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors and are subject to change without notice. Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

The above-mentioned list of important factors is not exhaustive. You should consider these and other factors carefully before making any investment decisions and avoid placing undue reliance on forward-looking statements. The Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise.
